Anywhere reports!

Sedona POS application gives managers a real time business control, displaying on mobile devices custom-made reports for different needs.

Features of Sedona POS Mobile Application for Front-Office

- ✓ Multiple operating users per terminal, with distinct activity reports.
- ✓ Bluetooth connection for invoice issuing on cash registers, portable and desktop printers.
- ✓ Optional sending invoices and receipts via email to customers.
- ✓ Connects to barcode readers via Bluetooth (ex. Motorola CS3070, Linea products for Apple).
- ✓ Easy to install updates.
- ✓ Easy selling by different methods: barcode scanning; intuitive product selection from a pre-defined list; multiple criteria articles search.
- ✓ Reports visualization (with access control).
- ✓ Secured communication between device and server.

Features of *Sedona Retail Software* for Back-Office

- ✓ Management reports and basic accounting reports.
- ✓ Option to **customize new reports**, together with Sedona Support Team.
- ✓ Easy Dashboard access – with most important reports with graphical interpretation.
- ✓ Works with Windows operating system.
- ✓ Automatic **data export** to other applications (such as Navision).
- ✓ **Data import** of product catalogs, suppliers and customers data information.
- ✓ Synchronize your information with **on-line store**.
- ✓ Operating the input documents is easier with “in line” filled items, without new windows opening. This innovative feature reduces administration time to less than half, compared to classic operating procedures.
- ✓ **Dynamic columns movement** in documents.
- ✓ Your settings can be saved for further implementation on other computers.
- ✓ Easy inventories, both manually and with mobile terminals, by keeping **inventories tracking history**.
- ✓ Back-Office Invoice Issuing.
- ✓ **FIFO operating mode** (First in First Out) with merchandise returns management.

About Us

Sedona was founded 12 years ago and since then we assisted more than 20.000 clients from retail industry. We grew together with our customers and we've learned how to use their feedback and to develop personalized solutions. This is how we started Sedona Retail, our in-house developed POS and management software solution, now available on mobile devices.

Start today to reduce costs and control your business with Sedona POS Software!
