# SafeGuard X-Frame

The use of tablets within the retail and hospitality environments is re-writing the ground rules for customer service and increasingly, POS. Their use as an in-store information point is obvious but developers are tapping into the real advantages of using these devices as part of the POS infrastructure.

Other applications abound where tablets can provide information-based solutions. Kiosks provide guided selling, product look up and ordering. In the back office, inventory control, product availability and quality control are key. For the hospitality industry, mobile order taking, processing and kitchen management are important requirements of today's catering environments.

With so many variations on applications and types of device, mounting options are more diverse than ever, requiring flexibility and style whilst ensuring security. X-Frame is the ideal solution for the most comprehensive range of Android™, iOS™ and Windows® based tablets.

The X-Frame broadens the overall scope of technology mounts for tablets, in effect enabling an ability to service all customer tablet requirements with this highly flexible design. It combines Ergonomic Solutions' traditional retail focus and knowledge with a new aesthetic design to meet the growing demands and use of tablet technology.

Security is important. Tablets are high value and highly sought after. ClickSafe options are available for applications requiring hand-held or mobile operation. Ergonomic Solutions understands technology and technology integration and we also understand the physical security requirements of these valuable assets.

X-Frame is a lightweight, easy to handle, low profile solution that keeps the essential buzz of using a tablet whilst offering a secure mount with a range of options depending upon the requirements of the application.

# Product Portfolio

## Fixed Position: Desk Top & Counter Mounting (SPXFx01)

### Key features:

- Secure light weight 2 piece frame that clamps around the tablet
  - Maintains tablet aesthetics and feel
- 120mm pole with internal cable management
  - 98mm footprint
- 0-70 degree tilt featuring patented DuraTilt® in-built tilting mechanism
  - Tested through 250,000 cycles
- Simple & timely installation
- Fully upgradable for Technology changes

## Axis Orientation: Desk Top & Counter Mounting (SPXFx02)

### Key features:

- Secure light weight 2 piece frame that clamps around the tablet
  - Maintains tablet aesthetics and feel
- Portrait to landscape rotation - left or right
- 120mm pole with internal cable management
  - 98mm footprint
- 0-70 degree tilt featuring patented DuraTilt® in-built tilting mechanism
  - Tested through 250,000 cycles
- Simple & timely installation

## Hand-held: Secure yet Removable (SPXFx03)

### Key features:

- Secure light weight 2 piece frame that clamps around the tablet
  - Maintains tablet aesthetics and feel
- Mounting cradle for fixed use
- Secure ClickSafe® curly cable tether - hand-held applications
  - No trailing cables
- 120mm pole with internal cable management
  - 98mm footprint
- 0-70 degree tilt featuring patented DuraTilt® in-built tilting mechanism
  - Tested through 250,000 cycles
- Simple & timely installation

## Quick Release: Mobile Enabled (SPXFx04)

### Key features:

- Secure light weight 2 piece frame that clamps around the tablet
  - Maintains tablet aesthetics and feel
- Quick release and secure ClickSafe® tether - fixed or mobile devices
  - No trailing cables - managed internally
- Portrait to landscape rotation - left or right
- 120mm pole with internal cable management
  - 98mm footprint
- 0-70 degree tilt featuring patented DuraTilt® in-built tilting mechanism
  - Tested through 250,000 cycles
- Simple & timely installation

## Ergonomic Solutions

Founded in 1996, Ergonomic Solutions has grown rapidly to become a global leader in the design, manufacture and supply of the most ergonomically advanced mounting and security solutions for a wide range of in-store, and mobile technology for markets including retail, banking, mass transit, and hospitality. Ergonomic Solutions has long been at the forefront of workspace planning and optimisation and our influential Ergonomics Consultancy has advised many of the major European retailers how to create a workspace which optimizes accessibility, usability, safety and comfort for their staff and customers.

Our suite of SpacePole®, Telehook®, Spacedec®, ClickSafe® and SafeGuard™ patented technology products are ergonomically designed to allow movement flexibility with rotation, tilting, elbow arm and height adjustable capabilities. From the shop floor to the management suite, we can deliver a solution that ensures that your IT investment makes the best use of the available workspace whilst simultaneously being protected from damage and theft.
