

SpacePole Light[®]

Payment Terminal Mounting Solutions

Featuring
MultiGrip™ Plate Technology

BENEFITS AT A GLANCE

- Simple tilting mechanism
- *MultiGrip™* plate technology
- Cost effective upgrades
- Unique ergonomic design
- Smooth operation of terminal
- Full cable management
- 2 years warranty
- RoHS and REACH compliant

Payment Terminal Mounting Solutions

Featuring *MultiGrip*™ Plate Technology

Payment technology located at retail checkouts and point of sale counters are required to withstand the rigors of continuous operation by both cashiers and customers. Payment terminals also need to be mounted in a manner that provides accessibility to as many users as possible.

SpacePole® Light, the composite based alternative to standard SpacePole® offers tilt, rotation and is fully compatible with the **MultiGrip™** plates. The simple yet functional and retail proven design of SpacePole® Light provides quality at a price point, tested through 100,000 cycles and supplied with a 2 years warranty .

Tilting Mechanism

- Range of tilt which meets all recommended ergonomic requirements for disability access and reduces the need to remove payment terminal from the stand

Payment Terminal Rotation

- Rotates from the customer side around to cashier side
- Complete plastic design provides smooth operation

Technology Plates

- All plates offer a unique system of multiple plate mounting positions for any environment at the of point of sale
- **MultiGrip™** - Patented friction pad design, ensuring payment terminal is gripped securely, whilst remaining easy to remove for disability access. Ergonomic tilt handle as standard
- Key Hole design - (dependant on terminal type) enabling the terminal to be locked into position on the plate. No tilt handle as standard

Cost Effective Simple Upgrades

- The **MultiGrip™** plate is simply positioned and screwed to the tilt joint
- Increased return on investment due to plate only upgrade

Additional Peripherals

- Including contactless and bio-metric card readers
- Security enhancements can be incorporated with any solutions

Cable Management

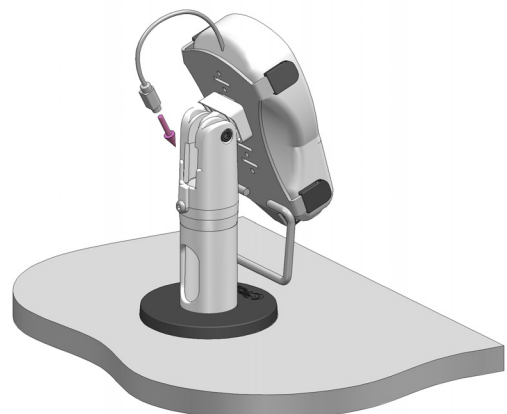

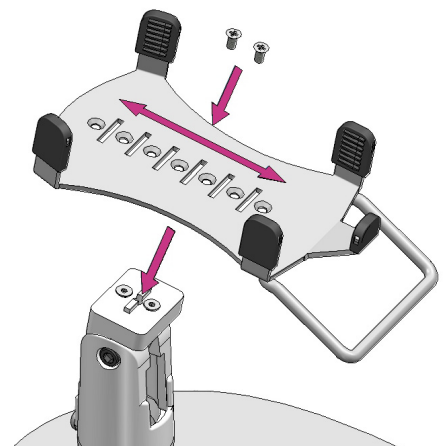

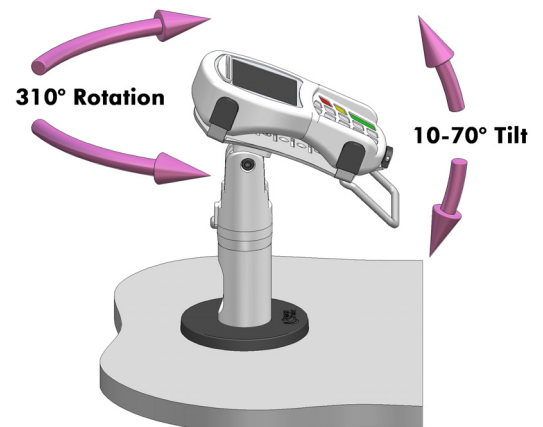

- Full cable management
- Limited head rotation to ensure cables are not stressed

Other Design Features

- Plastic flange cover to hide fixings
- Simple and quick to install
- Complete boxed solutions, including fixings and mounting instructions

Warranty

- 2 years on all parts manufactured by Ergonomic Solutions.

ClickSafe™

To protect digital information, prevent data loss and further secure hardware, Ergonomic Solutions recommends SpacePole ClickSafe, a security lock for payment terminals, mobile devices and POS hardware. ClickSafe has been specifically engineered to withstand the rigors of a potentially hostile environment and protect payment terminals and hardware from abuse and theft. ClickSafe features unique SpacePole integration and the keyless installation only requires you to click the lock in place.

The assured quality and testing standards of the SpacePole ClickSafe ensures piece of mind for both the retailer and customer. The solution fits all physical security requirements, features ease of installation and provides the unique possibility of integrating it with existing SpacePole products enhancing both flexibility and security.

ClickSafe comes in the formats Dual Lock Curly Cable and Single Lock Straight Cable.
